

ESPOO CEILING™

Esboo is an innovative bioethanol burner that combines advanced functions with a focus on design and safety. A filling system with an external electronic pump offers several advantages for the user. It provides a more precise, controlled and drip-free filling process.

The built-in sensor detects the temperature of the burner, which completely prevents refilling if the tank is still hot or in use. The bio burner is started quickly on the ignition button. This means that you completely avoid challenges with matches or lighters. The burner can easily be adjusted or switched off.

INCLUDE:
External Fuel Pump

Automatic ignition

TECHNICAL INFORMATION

| | |
|------------------|---------------------------------------|
| Capacity: | 2,4 L |
| Burning time: | 5-10 h (depending on flame intensity) |
| Heat efficiency: | 1.3 - 2.6 kW/h |
| Net weight: | Approx. 37 kg |
| Finish: | Powder- coated matt black as standard |
| Bar: | Brushed stainless steel |
| Fuel: | Use bioethanol at 96.5 - 97.5% |

FEATURES

- No chimney required
- No smoke, ash or soot
- Automatic ignition of the fireplace
- Built-in heat sensor
- Telescopic bar for height adjustment and casing that can be turned 360 degrees.

ACCESSORIES

- External Fuel Pump included in price

BIOETHANOL

For use and information about bioethanol, please visit our website [decoflame.com](http://www.decoflame.com).
(Please be aware that bioethanol is essential to a proper use and guarantee of your product).
