DENVER F6 BURNER

Filament

For filling

Standard Control Panel

External Fuel Pump included

Flametray

Operating:

Step 1	Turn on the electronics of your Denver F6™ by pressing the ⏻ button.
Step 2	Fill in the right amount of bioethanol in the fuel tank by verifying the level on the fuel level indicator.
Step 3	To ignite the fireplace: Press the ▶■ button on the control panel. After about 3 minutes, the first flames will appear around the centre of the flame tray.
Step 4	When the filament no longer is red/glows (approx. 10 min) it is possible to adjust the flames.
Step 5	To switch off the fire at any time – also during the warming-up phase – press the ▶■ button on the control panel. The flames will disappear within few minutes.

Use the supplied remote control or download the Decoflame App to your mobile device for controlling the biofireplace.

## Installation of Decoflame App to the Denver F6 burner
App Store

Thermal Output:	max 2.9 kW	
Fuel Type:	bioethanol 96%	
Room Volume:	min. 58 m3	
Radio Frequency:	433.92 MHz	
Bluetooth Code:	0001	
Manufacturer:	Decoflame ApS - Made in Denmark	

1. Download and install the Decoflame App corresponding to your smart device's operating system. For more information go to: decoflame.com.

2. In order to pair your fireplace with your smart device, start the fireplace by pressing the 'ON' button.
Start the App and choose your fireplace.
Insert the code from YOUR rating plate, like the one highlighted above.

3. Once your device is paired, the fireplace should be visible on the app. You are now able to change the name of the fireplace.
Note: You are able to pair more than one fireplace like described in the step nr. 2 and give them different names.

4. Once you have selected your fireplace, you can turn it on by pressing 'START'. If the fireplace has already been turned on using the control panel, you can now monitor the fuel level and the consumption.

5. For the 'Turn Off Timer' press the clock icon in the lower right corner. To adjust the remaining time, slide the dot to the left and right and select 'SET TIMER'. The remaining burning time can be changed by repeating the above mentioned steps. To cancel the timer select 'CLEAR TIMER'.

6. For adjusting the flame intesity, select the desired level on the left side of the screen. (1-lowest, 5+ECO Wave or 6-highest depending on the model chosen). Should there not be enough fuel for the selected burning time - the fireplace will shut down automatically.
Select 'STOP' to turn off the fireplace.

Consumption and burning time are indicative.
